

## World Environment Day : 5th June 2017

*Connecting People to Nature – in the city and on the land, from the poles to the equator.*

Every **June 5<sup>th</sup>** is observed as **World Environment Day**. This time, Canada is the host nation. On this day, communities and individuals around the world work to increase awareness of the importance of conserving the environment, the positive global impact of environmental regulations and controls and engage in activities that serve to educate and improve their environment locally. It grew out of the efforts of leading environmentalists who recognized the need for there to be a coordinated global focus to begin to make conserving the environment and our natural resources a priority.

World Environment Day Activities :

Though students were having a very busy schedule that day, they managed to do some awareness programs which covered topics like,

- Weed and fertilize public trees and gardens.
- Collect trash in your community.
- Come out with a plan that could help you to energy and reduce your monthly electricity bills.
- Dispose hazardous waste like batteries, paint cans, old electronics in recycling centres. Clean up litter on roads.
- Research more about the environment issues (air, water and land pollution) and come out with your own ideas to control them.
